### Intelligent antivirus

Detects all kinds of nasty threats, from viruses to malware. Yes, even spyware, ransomware, and phishing attacks.

### **NEW** CyberCapture

Personal, real-time threat detection. Sends unknown files to the Avast Threat Labs to be analyzed by our experts, and quarantines them if they're dangerous.

### Home Network Security

Is your router set up properly to block threats? We'll tell you. Otherwise, anyone can break into your home network and anything connected to it.

### Smart Scan

The ultimate time-saver. Check your PC and network for all kinds of issues in just one easy click.

### Firewall

You lock your front door to keep thieves out of your home – so why should your computer be any different? Firewall keeps you safe from all kinds of intruders.

### Browser Cleanup

Get rid of mystery toolbars, add-ons, and extensions that were installed without you noticing – and without your permission.

### Sandbox

Ever downloaded a file from a shady server and suspected it's trouble? Test files in a sealed space first, and keep the rest of your PC safe.

### Passwords

Too many passwords, none of which are safe? It's fairly common. Remember just one, and Avast Passwords will take care of the rest.
